

viropower.

**ELIMINATES
VIRUSES + BACTERIA.**

**DESTROYS 99.9% OF HARMFUL
PARTICLES IN THE AIR**

viropower.

Thank you for purchasing the ViroPower.

We are all in this together. These new world developments push us at Dr. Müller to brave on new challenges. Thanks to our undisputable experience in the Medical and Wellness industry, we have developed a unique device to make you and those around you feel safe.

With the ViroPower you no longer have to worry about harmful particles in the air. The **Dust** and **HEPA filter**, and **UVC Light** inside the ViroPower **eliminates 99.9% of viruses and bacteria**, leaving only clean air.

Without a doubt, we have to adjust to our new environment. But we will do it our way.

What is the ViroPower.

The ViroPower is a mobile UVC light air cleaning device with Dust and HEPA filters.

Dust filter.

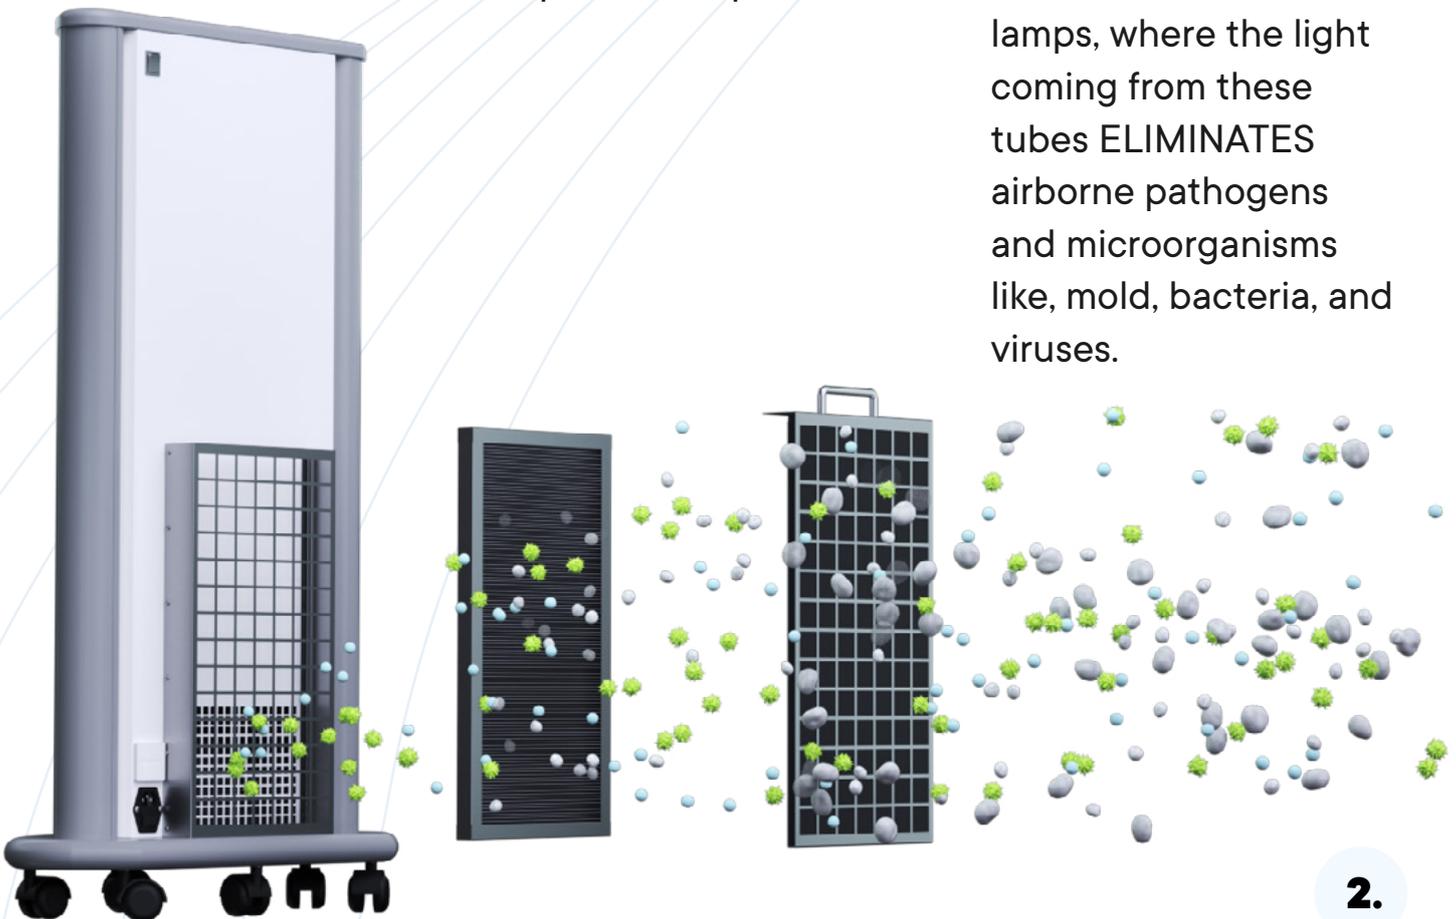

First, the ViroPower draws in the polluted surrounding air. This air goes through the Dust filter to get rid off (fine) dust mites.

HEPA filter.

While you may think that the air is clean, we've added an extra step, the HEPA filter, that blocks large parts of harmful particles, like pollen and pet dander.

UVC light.

Then comes the exciting part, which sets the ViroPower apart from the rest, UVC light. The airflow goes through a compartment that houses UVC lamps, where the light coming from these tubes ELIMINATES airborne pathogens and microorganisms like, mold, bacteria, and viruses.

viropower.

UVC Light proven for 100 years.

Dr. Ing. Felix Müller, the founder of Dr. Müller, invented the quartz lamps for UV and infrared machines for medical use in 1926. Almost 100 years later, this company has grown into one of the market leaders in the field of professional UV and light therapy devices. **We use our knowledge and experience to help improve the air quality.**

viropower.

The ViroPower promises.

Up to 300m³ of clean air

Draws in the surrounding air and releases clean air up to 300m³ per hour.

Eliminates 99.9% of viruses and bacteria

UVC light kills 99.9% of harmful particles from the air.

Decrease infection and sick leave

Office spaces are clean, which in turn decreases the chances of infection and sick leave.

Lasts 9000 hours

The UVC light lamps last 9000 hours. You don't have to continually check and worry about the surrounding air in your space.

Increase trust levels

By adding a disinfection device, you increase the trust levels within and outside of your company.

150W cleaning power

6x ozone-free (25W)
UVC lamps are responsible for eliminating harmful particles from the air.

Technical data.

Type	Specs
Voltage	220-250 Volt AC
Frequency	50-60 Hz
Light source	6x Sunfit UVC lamp 253.7nm 25W T8 Quartz (ozone-free)
	Expected life span 9000 hours
Driver	Sunfit electronic ballast 6x 25W 200-240 Volt 50-60 Hz
Air filters	Dust filter 250 x 500 x 10 mm
	HEPA filter 250 x 500 x 25 mm
Power consumption	200 Watt
Fan capacity	2 x 97/117 cfm (220-240 Volt)
Weight (with packaging)	27 Kg (33 Kg)
Dimensions ViroPower 6000	61.5 x 32.5 x 115 cm
Dimensions boxed	72 x 43 x 119 cm
Recommended room temperature	between +10 and +35 °C
Recommended humidity	max 80% at +25 °C

UVC Light research.

“Our test results shows after UV-C radiation, viruses were completely inactivated: In a matter of seconds we could no longer detect any virus.”

Halper, M. (2020, June 16)

“Scientists have known for decades that germicidal UV light has the capacity to kill viruses and bacteria.”

Cantor, C. (2020, April 21)

Rijksinstituut voor Volksgezondheid
en Milieu

“UV-C light ... is the most effective. UV-C disables the murine hepatitis virus (MHV) coronavirus quickly and easily in aerosols.”

RIVM (2020, June)

“UV-C radiation can play an important role in disinfection programs and in containing the virus responsible for COVID-19.”

TU Eindhoven (2020, April 14)
